⊙ SUMMARY

As a passionate Full Stack Developer with over 5 years of experience, I specialize in building robust web applications utilizing a wide range of front-end and back-end technologies.

My proficiency spans across critical problem-solving and effective collaboration, underpinned by a strong foundation in both traditional and innovative development methodologies.

Eager to leverage my technical skills and creative approach, I am committed to driving results and pioneering solutions in the dynamic world of web development.

🧰 EXPERIENCE

Full Stack Developer
Snce Group SAGL — Stabio, Switzerland

2019 — 2025

- Developed microservices for home appliance repair booking using PHP/Symfony, REST APIs, Vue.js, and AWS cloud (RDS, ECS, S3, CloudFront). Implemented containerized deployment with Docker orchestrated on ECS, ensuring zero-downtime releases through GitLab CI/CD pipelines. Integrated MySQL and DynamoDB databases with monitoring via CloudWatch and New Relic. Actively contributed to scalable architecture and frontend-backend integration, improving user experience and operational efficiency.

- Developed global retail store locator microservice with micro frontend, working closely with stakeholders and clients to gather requirements and define features. Implemented data ingestion pipeline with AWS Lambda for automated daily store database updates, ensuring real-time availability of global retail data. Technology stack: Node.js, TypeScript, AWS Lambda, REST APIs, Google Docs. Handled requirements analysis and functional demos with clients.

Web & App Developer
AllRentis Group SAGL — Quartino, Switzerland

2017 — 2019

- Developed and maintained dynamic website for tool and equipment rental using HTML5, CSS3, JavaScript, PHP, and WordPress. Created user-friendly platform with responsive design, supporting seamless rental transactions and improving user engagement.

- Developed Android application for employee working hours calculation using Java, Android Studio, and Firebase. Automated time tracking, reducing manual errors and streamlining payroll processes. Managed full development lifecycle from design to deployment.

Software Developer
InITeC SRL — Besozzo, Italy

2016 — 2017

- Developed web applications using .NET (ASP.NET Core) and SQL Server for clients requiring financial management tools. Implemented containerized deployment with Docker and GitHub CI/CD pipelines. Managed full software development lifecycle from design to deployment, delivering high-performance solutions for streamlining financial operations. Technology stack: ASP.NET Core, SQL Server, Docker and Datagrid plus Bootstrap for responsive UI design.

🎓 EDUCATION

Bachelor Degree in Computer Science
University of Applied Sciences of Southern Switzerland (SUPSI) — Lugano, Switzerland

2022 — 2026

Computer expert
I.S.I.S. City of Luino - Carlo Volonté — Luino, Italy

2011 — 2016
